

 NEWS

Pioneering Floating Projects

OCA is excited to share that it has been supporting pioneering floating projects in both US and Europe.

In the US we have provided due diligence services to a leading engineering and technology developer for their submission to Phase 2 of the FLOWIN prize. The FLOWIN Prize focuses on plans to transition floating platform technologies from proven designs to serial production for commercial-scale deployment.

Over in Europe, we have provided Project Management for fabrication and assembly of a demo floater at a French port, providing the Client with procurement management, scheduling and risk identification.

 NEWS

Unrivalled US experience

OCA has been providing specialist expertise and resources to the US Offshore Wind industry since 2018 and has unrivalled experience gained from working on a number of projects (including Vineyard Wind 1) across all stages of the project lifecycle.

From conducting early stage feasibility studies and port assessments, providing long-term resources to support development, design and preparation as well as on-site support during fabrication and construction, our US team have built up an in-depth level of knowledge of offshore wind projects. In the background they are supported by OCA's experience from the UK and Europe.

If you would like to know more about our services please contact Helena Estrada to arrange a meeting.

LET'S MEET!

So we can discuss how OCA can support your project.

 EVENTS

OCA will be attending

22-25 April, New Orleans US

6-9 May, Houston US

18 - 19 June, Manchester UK

 PEOPLE

Arianna in Europe

From January to April, Senior Project Consultant Arianna Sawyer from our Boston office spent some time in our office in the Hague sharing knowledge with colleagues, renewing her GWO training and inspecting transition pieces and installation vessels destined for the US market at sites in Spain.

Ari did get chance to make the most of her time in Europe and has spent her weekends exploring the Netherlands, visiting Edinburgh and Bruges, skiing in Chamonix, France and taking in the Gaudi sites in Barcelona!

This secondment has been a great opportunity to actively promote knowledge sharing across the business and give our consultants a broader experience of the industry.
